Features include:

- Infinitely controllable
- Easy to fit
- Suitable for timber, aluminium, PVCu or composite windows
- Designs registered and patented
- Ideal for night ventilation do not compromise security
- User friendly operation
- Cord or rod operation available on most models

Finishes

Titon ventilators are supplied in the following finishes, many of which are stock items. Please phone for up to date availability:

Aluminium ventilators - White Paint (RAL9010), Brown Paint (RAL8017), Satin Anodised Aluminium, Albrafin Gold.

Plastic ventilators - White, Bright White, Brown, Toffee.

Other finishes available on request.

Slot Ventilators

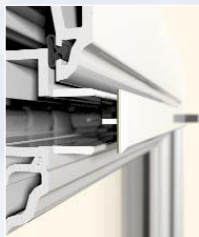

TV Select S13

- Fitted onto the window sash or frame or mounted on an overhead section
- Aluminium or plastic models
- Canopies and grilles give protection against rain and insects

Trimvent ventilators

- Deflect the incoming air in all directions
- Ventilator opening cannot be obstructed by a reveal
- The first Trimvents were fitted approximately thirty years ago

Trimvent Select ventilators

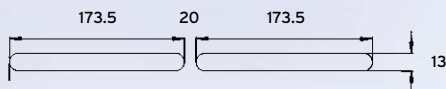

- As Trimvent products with the added unique feature of an adjustable tilting T-bar
- This allows the building occupant to control both the direction and the amount of incoming air

Trimvent Select ventilators are part of the Select Suite of products, the first matching window handle and trickle ventilator range.

Slot dimensions

Slot sizes shown in the Details tables are for round ended slots, i.e. 173.5 + 20 + 173.5 x 13 refers to:

Fully detailed scale slot diagrams and dimensions for square ended slots available on request.

Placing a Slot ventilator order

All Product codes are listed in the Details table on each product page and should be quoted when ordering. Please ensure both an internal ventilator and an external grille or canopy are ordered for each particular window. Some Titon ventilators are available in vent and canopy packs, full details on request. Product finishes are listed overleaf.

Glazed-in Ventilators

Maxiglaze

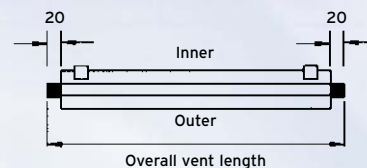

- Easy to glaze-in, can be treated as an extension of the glass
- Can be cut to length and assembled by the customer (not Trimvent Multiglaze) or supplied made to measure
- Integral canopy for protection against ingress of rain and insects

Placing a Glazed-in ventilator order

All made to measure ventilator product codes are listed in the Details table on each product page. As every made to measure glazed-in ventilator is produced specifically for each order, please quote the following information when placing an order:

- The overall vent length
- The glass thickness
- Plastic or aluminium canopy
- Finish (inner and outer)
- Air opening required
- Quantity

To calculate the overall vent length see diagram:

The 20mm dimensions are always constant, Therefore the body length is always 40mm shorter than the overall length. Please make any allowances for fittings beads, gaskets etc., or for manufacturing tolerances.

An exact glass reduction dimension is not given for each product. Consideration must be given to the glazing method.

For glazed-in ventilators in bar length, please consult the Titon Sales Office for ordering details.
