BASA
BRITISH ADHESIVES & SEALANTS ASSOCIATION

Adshead Ratcliffe & Co Ltd

The philosophy of innovation has been a hallmark of Adshead Ratcliffe's policy of developing new and improved products from 1859 through to present day. We have been regarded as the premier manufacturer of sealants for many years, and we continue to invest in our people and products. We are committed to supplying quality products manufactured to exacting standards, to our many customers at home and abroad.
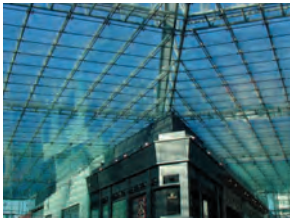

PRODUCT PORTFOLIO

Our **ARBO** brand sealants are respected throughout the building, glazing and construction industries by architects and contractors, and with specialists products available for marine, automotive and industrial sectors our customer base is wide.

As a dedicated sealant manufacturer we are able to supply products to meet virtually any requirement and our in-house research and development facilities are able to tailor–make sealants for more specialised applications and for colour matching to order.

COMMITMENT TO QUALITY

Our commitment to quality and to pushing forward industry standards is reflected in our ISO 9001:2008 certification, along with membership of "The British Adhesives & Sealants Association (BASA) and membership of the BSI "British Standards Institute".

Working closely with a wide range of specifiers such as Architects, Surveyors and Local Authorities, we follow from the early stages of design right through to completion with Sealant Applicators, then if required as part of the Arbomaster Warranty Scheme, we carry out on site inspections of the applied sealant.

CUSTOMER SERVICE   Direct Telephone Line: 01773 826661

Our friendly staff are committed to giving you the highest levels of service and most products are available ex-stock.

Next day deliveries can be arranged in conjunction with our logistics partners, with normal delivery within 48 hours.

TECHNICAL SUPPORT   Direct Telephone Line: 01773 826661

Technical queries and written specifications are available through our technical support line, with our highly trained and experienced staff able to answer any questions.

Our testing facilities are also available to assess the suitability of sealants against specific substrates to ensure compatibility and performance.

Striving to better meet industry needs, our website **www.arbo.co.uk** provides desk top advice for architects and specifiers, assisting sealant selection. Detailed technical data sheets are also available on our website at: **www.arbo.co.uk**

SALES SUPPORT

Our field sales team covers the entire UK and is pleased to visit and advise customers on the selection and availability of our products - this includes sites visits and tool box talks when necessary.

CONTINUOUS IMPROVEMENT

The culture of our company is one of continuous improvement and the specification of our products will evolve in response to technological advances, research and development and environmental factors.

Arbo Façade Solutions

Adshead Ratcliffe was established over 150 years ago manufacturing chemical products in Derbyshire, England.

Today their range of sealants and glazing products under the trade name of Arbo are recognised world wide.

The philosophy of innovation continues with the creation of the Arbo Façade Solutions (AFS) Division.
This new division enables the company to further develop it's EPDM range, thus support our customer demands for sealing building façades. It offers structural glazing products and at the same time adding new products in partnership with specifiers and fabricators to achieve the latest standards of air and water tightness in modern construction.

Arbo Façade Solutions' aim is to serve the lightweight cladding industry by supplying a range of products to system designers of curtain walling, rainscreen systems, window manufacturers and installers by offering technical advice and ancillary products to this market sector.

Arbo Façade Solutions have a portfolio of products including Arbo EPDM systems one and two part structural silicone sealants and a range of sealants, adhesives, security tapes and expanding strip products and adhesive membranes to solve the designer's requirements.

This is an evolving market and we will be happy to discuss new products by co-operating with window system designers offering sealing solutions to your product.

ARBO EPDM MEMBRANE SYSTEM

Following the introduction of document L, it has become a requirement to provide a robust seal to the internal interfaces between different façade components of a construction. The purpose of this seal is to reduce heat and air leakage from a building and to help prevent interstitial condensation. To aid rapid construction techniques, contractors demand that a building is made substantially waterproof as early as possible during construction. The use of the Arbo EPDM system plays an important role in acheiveing this aim.
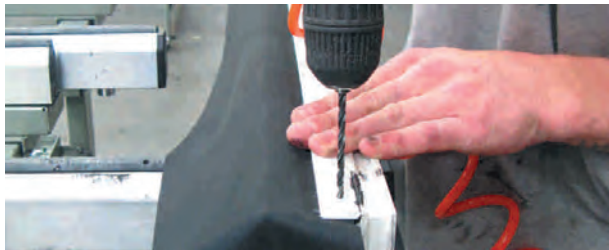

EPDM MEMBRANE AVAILABLE IN SIZES FROM 100mm TO 1.4 METRES WIDE (IN 50mm INCREMENTS)
